

PAYRAM

MEET PAYRAM

**The only *private*
payment gateway you
can run yourself.**

✓ **No more account locks.**

✓ **No more fund freezes.**

✓ **No more T+1 settlements.**

**Self-hosted. Self-custody. Stablecoin
payments.**

ANY OTHER GATEWAY

Account locked. Anytime. For any reason.

PAYRAM • SELF-HOSTED

No more account lock. It runs on your server. There is no account.

PAYRAM

ANY OTHER GATEWAY

**Your money sits with them.
Frozen anytime.**

PAYRAM • SELF-CUSTODY

**No more fund freeze. Funds
land straight in your wallet.**

PAYRAM

ANY OTHER GATEWAY

T+1, +2, +3 settlements. Payout holds. Weekend blackouts.

PAYRAM • INSTANT

Settled in seconds. 24/7/365. Weekends included.

PAYRAM

ANY OTHER GATEWAY

**Every transaction watched.
Activity reported.**

PAYRAM • PRIVATE

**No monitoring. No reporting.
Data never leaves your server.**

MERCHANTS WORLDWIDE ARE SWITCHING

The only gateway in the world built this way.

Self-hosted + self-custody + stablecoins

Nobody else combines all three

Set up once. Always on.

Permanent, like your domain name

No terms change can evict you

Architecture, not policy

\$100M+ processed · 850K+ users · 100+ countries

No signup. No approval. No KYB.

THE RAILS

Everything a gateway should be.

USDT and USDC, plus BTC, ETH, TRX

Stablecoins first, major chains included

Payouts straight from your wallet

No intermediary approvals, no delays

Checkout, invoices, live dashboard

Everything out of the box

Referral and payout campaigns built in

Growth tools on your own rails

And customers without crypto can pay by card.

BUILT FOR WHAT'S NEXT

Your next customer might not be human.

AI agents discover you and pay you

Native MCP support, live today

Sell inside WhatsApp and Telegram

Your OpenClaw agent takes payments in chat

Agent-first infrastructure

Ready for commerce between machines

Gateways built in 2015 can't learn this.

OPERATOR MODE • THE BIGGER PLAY
